

Maintenance, Overhaul and/or Upgrade Requirements

I. INTRODUCTION

A. Army Materiel Command (AMC) and its units use Total Asset Visibility – Contractor (TAV-C) capability in its Logistics Management Program (LMP) to account for Government Furnished Equipment, Materiel, or Property (GFE/M/P) placed in the possession of contractors to support contracts for: 1) Maintenance, overhaul, or upgrade work; 2) materials held for Stock, Store and Issue (SSI), or 3) New Production. Accounting records within LMP for this inventory are subject to verifying physical inventories and audits by the Army to ensure accuracy. This section addresses contractor requirements for maintenance, overhaul and/or upgrade contracts.

II. SYSTEM OVERVIEW AND PORTAL ACCESS REQUIREMENTS

A. To use TAV-C, Contractors shall request one of two TAV-C access methods below to exchange required inventory data with LMP: 1) Defense Logistics Management Standards (DLMS) interface or 2) the Army TAV-C Portal. Approval of the contractor's access method will be based first on the type of work being performed, second, the sufficiency of the contractor's existing property accountability and connectivity to LMP, and third, request by the contractor to use the portal based on economic factors.

B. Contractors shall choose between the two methods for accounting for Government property as further described below:

1. DLMS interfaces: Contractors that have accounting systems capable of using a DLMS interface (see: DLM 4000.25, Defense Logistics Management Standards (DLMS) on the Defense Logistics Agency (DLA) website <https://www.dla.mil/>) shall request to use their accounting system and interface to account for GFE/M/P using DLMS transactions.

NOTE: If a contractor does not currently have an established DLMS interchange with DLA Defense Automated Addressing System (DAAS), the Contractor shall contact DAAS to establish access to DAAS messaging system to support the exchange of DLMS transactions with the Army. DAAS provides a value added service for standard Military Standards (MILS) transactions providing the ability to receive, edit and route logistics transactions for the Military Services and Federal Agencies. Information on DAAS can be found at <https://www.dla.mil/HQ/InformationOperations/DAAS/>

2. Army TAV-C Portal: Contractors, who, during negotiation with the Government, are determined to be allowed to use the TAV-C Portal, shall comply with prescribed processes to provide qualified workers to access the system to exchange data with LMP.

C. Portal Access Requirements. Contractor personnel, who input data into the TAV-C Portal, shall meet qualification requirements specified in the TAV-C Portal User Access – End User SOP. These requirements include:

1. Contractor provided computer system: The contractor shall provide a computer system and internet connectivity that meets acceptable standards as identified in the TAV-C Portal User Access – End User SOP.

2. Security Requirements.

(a) The Government requires contractor personnel accessing the LMP system to possess either a United States Government Common Access Card (CAC) or a

Contractor Overhaul TAV-C Requirements

Department of the Defense approved ICAM Multi-Factor Authentication (MFA) Certificate.

NOTE: It is the contractors' responsibility ensure operators accessing the portal have and maintain current credential and to comply with contract requirements.

- (b) Contractors will coordinate with the Contracting Officer's Representative (COR) or designated government sponsor (herein referred to sponsor) to complete required online access registration and MFA process.
- 3. User Training Requirements: TAV-C Portal user training is Government provided and varies by the function performed. The training is online and completion of the training by each operator is required before accessing and using TAV-C.
- 4. The on-line training site will be provided by the government after award and access to the system has been granted. Functional training required to begin work should take approximately 1 hour to complete. The following courses are required for contractor overhaul and are listed under the TAV-C Portal User Role to Training Course Matrix section in the TAV-C Portal User Access – End User SOP.
 - a. LMP_TAVC_EDU_109_WBT
 - b. LMP_TAVC_DIST_204_WBT

D. Problem Resolution: LMP is a Government owned and maintained system. The contractor shall notify the COR or designated Government point of contact for system related issues and Government resolution.

III. DLMS TRANSACTIONS / PORTAL DATA REQUIREMENTS

- A. For maintenance, overhaul and/or upgrade contracts, the contractor shall provide inventory management transactions to the Government by DLMS interface as follows:
 - 1. DLMS 527R Materiel Receipt Acknowledgement (MRA) Transactions (for Government Furnished Material (GFM) expected to be consumed and GFE-R carcasses provided for overhaul).
- B. For DLMS Transactions for maintenance, overhaul, and/or upgrade contracts, the material receipt transactions to be provided to the contractor by the Government via the DLMS interface are:
 - 1. DLMS 527D Pre-positioned Material Receipt Document for stock in-transit to vendor.
- C. Army TAV-C Portal: Contractors who, during negotiation with the Government, are allowed to use the TAV-C Portal shall exchange required data directly with LMP. Contractors who use the TAV-C Portal shall provide the following information via data inputs to LMP.
 - 1. TAV-C Portal Requirements: Material Receipt Acknowledgment (MRA)

IV. PERFORMANCE REQUIREMENTS

- A. The Contractor shall physically confirm material received (MRA) for actual National Item Identification Number (NIIN) and Quantity prior to recording receipt into LMP through DLMS or the TAV-C Portal.

Logistics Modernization Program Total Asset Visibility – Contractor (TAV-C) Portal Access Standard Operating Procedure for End Users (version 03)

Change: User access procedures have been updated; SOP separated by role

LMP's TAV-C capability extends asset visibility to contractor locations, contributes to bettering the Army's view of assets, and supports Army Readiness.

LMP TAV-C Portal End User Access Procedures

Introduction

Logistics Modernization Program's (LMP) Total Asset Visibility – Contractor (TAV-C) capability was developed to resolve audit findings related to the management of Army property. TAV-C capability extends asset visibility into contractor locations through improved recordkeeping and provides more accurate reports associated with this Government property. Use of TAV-C functionality by contractors is mandatory for Army Working Capital Fund (AWCF) managed property in the possession of contractors. This solution contributes to the management of assets supporting global equipment Readiness through LMP.

Contractors using the TAV-C Portal to input information into LMP will comply with the access processes described in this guide to establish and maintain user accounts, complete access processes, as well as Department of Defense (DoD) approved authentication, to receive access to this capability. The approved authentication is achieved one of two ways: with a Common Access Card (CAC) or via the creation of an Identity, Credential, and Access Management (ICAM) account in conjunction with multi-factor authentication. The ICAM program is designed to provide the mechanism for external entities to securely communicate with the DoD and authenticate to DoD information systems.

It is recommended Contractors carefully review this document and consider the amount of time needed to establish and maintain user security credentials, complete mandatory systems access training, apply for access to the system, and complete task specific user training.

— Until these requirements are satisfied, portal access will not be granted. —

The Training to FSR Matrix provides a list of user functional training courses and refer to the solicitation to verify the TAV-C functions needed for the effort.

Purpose Statement

The purpose of this document is to provide an understanding of the process for gaining access to the LMP TAV-C Portal solution for TAV-C Portal Contractors. The TAV-C Portal Contractors include:

- 1) Stock, Store, and Issue Contractor Portal Users
- 2) Vendor Proof of Delivery Contractor Portal Users

Please note that the DoD ICAM process illustrated in this document provide instructions on how to request an account and register in through Army Mobile Connect on any device that allows the user to get to the app store for double authentication. (Cellular phone or tablet) etc. Apple Store, Google Store or TRADOC App Gateway.

Internet Access to the LMP TAV-C Portal has been validated using Windows 10 or later, Edge, and Google Chrome browsers. Hardware requirements for LMP TAV-C Portal would be any hardware that can support Windows 10, Edge, and Google Chrome and connect to the Internet.

LMP TAV-C Portal End User Access Procedures

TAV-C Portal Access – ICAM Account Process Flow

General Process Information & Assumptions

- In accordance with AMC Operations Order 19-229, dated 111810Z Sep 2019, this guide establishes procedures and guidance for users to gain access to the TAV-C Portal.
- The Contracting Officer (KO) works with the requiring activity to establish a Contract Officer's Representative (COR) (preferable) to appoint for contract users. If the contract has no COR, the requiring activity shall immediately appoint a DA Civilian to serve as sponsor. The COR/DA Civilian is referred to as the sponsor hereafter.
- The sponsor informs the TAV-C Portal contractor of these procedures and requirements and assists end users with gaining access to the TAV-C Portal. The sponsor reviews and approves the establishment of LMP end user accounts supporting TAV-C Portal processes. The sponsor functions as the Contractor's point of contact for LMP systems issues.
- The Sponsor works with the designated Command UAM Administrator to identify TAV-C Portal Functional Security Roles (FSRs) required by the contractor.
- Organizations will follow their documented policy for assigning FSR to Portal end users.
- The COR/Sponsor works with the designated Command UAM Administrator to identify the access required by the contractor.
- The Command UAM will manage the required annual account review, which is required for TAV-C Portal end users.

LMP TAV-C Portal End User Access Procedures

Process Details – Performed by the End User (without a CAC)

TAV-C Portal users who will not be using a CAC are required to have the following:

- Identify, Credential, and Access Management (ICAM) account
- Identity record in Army Master Identity Directory (AMID)
- Multi-factor authentication (MFA)

The information in this section is for TAV-C users without a CAC. Proceed to the [Process Details - Performed by the End User \(with CAC\)](#) section for CAC-enabled user guidance. The End User will be contacted by the COR/Sponsor to begin the ICAM account creation process. The ICAM account process will result in the User having an account setup in AMID. This is a time-sensitive process. See [Appendix A](#) for step-by-step instructions. The End User process steps are as follows:

1. User receives an email application to create their account in AMID via the ICAM Portal.
2. User completes the application information and submits the application, then notifies the Sponsor.
3. User receives a confirmation e-mail that their application has been approved by the Sponsor.
4. User completes the ICAM account setup process, which includes setting a password and setting up security questions.
5. User verifies they can log into the ICAM Portal successfully with their username and password.
6. User sets up multi-factor authentication (MFA) and notifies the Sponsor that their account creation and MFA setup is complete.
7. User completes the following requirements:
 - a. Information Assurance/Cyber Awareness (IA/CA) Training for Non-CAC enabled users @ <https://public.cyber.mil/> → Training → Cyber Awareness Challenge.
 - b. Digitally signed Army IT User Agreement.
8. Once #7 is complete, the User sends the certificate and signed agreement to their COR/Sponsor; these requirements must be completed before submitting any access requests.
9. The COR/Sponsor and UAM will continue the process and grant the user the “TAV-C Universal Role” to allow the User access to the TAV-C Training Library via the TAV-C Portal
 - a. Users must complete appropriate TAV-C functional web-based training courses. See [TAV-C Portal User Role to Training Course Matrix](#) for further guidance.
 - b. User will send their TAV-C training certifications to their COR/Sponsor to be sent to the UAM for final LMP functional security role (FSR) access provisions.

LMP TAV-C Portal End User Access Procedures

10. Once LMP account is updated and FSRs are assigned, the User can begin using the TAV-C Portal with their ICAM Account Username, Password and MFA.

Process Details – End User with CAC

TAV-C Portal Users who will be getting a CAC, or who have a CAC, should work with their designated UAM for guidance on getting an LMP account. This is an existing process. A signed company memo is still recommended for TAV-C CAC users, if they will only be using LMP for TAV-C purposes.

For initial guidance, refer to the process flow and steps below.

The steps below are needed to complete a System Authorization Access Request (SAAR) to grant LMP access. This is for CAC users only. NOTE: The SAAR form is subject to change; this is based off the form as of May 2022.

TAV-C Portal CAC end user completes blocks 1 through 16A of the of DD 2875 and submit to user UAM.

- **Supervisor for CAC holders** completes blocks 17-17e of the DD 2875 and submits to responsible Unit Security Manager.
- **Unit Security Manager** completes blocks 22-26 of DD 2875 & and return to requester.
- **Site Information System Security Officer (ISSO)** completes blocks 19 – 19c of DD 2875 and returns to the requester.
- **Site UAMs** receive the completed SAAR form and add it to the user's LMP account once the account is created

Appendix A – End User Instructions

Create an Identity Record in (AMID)

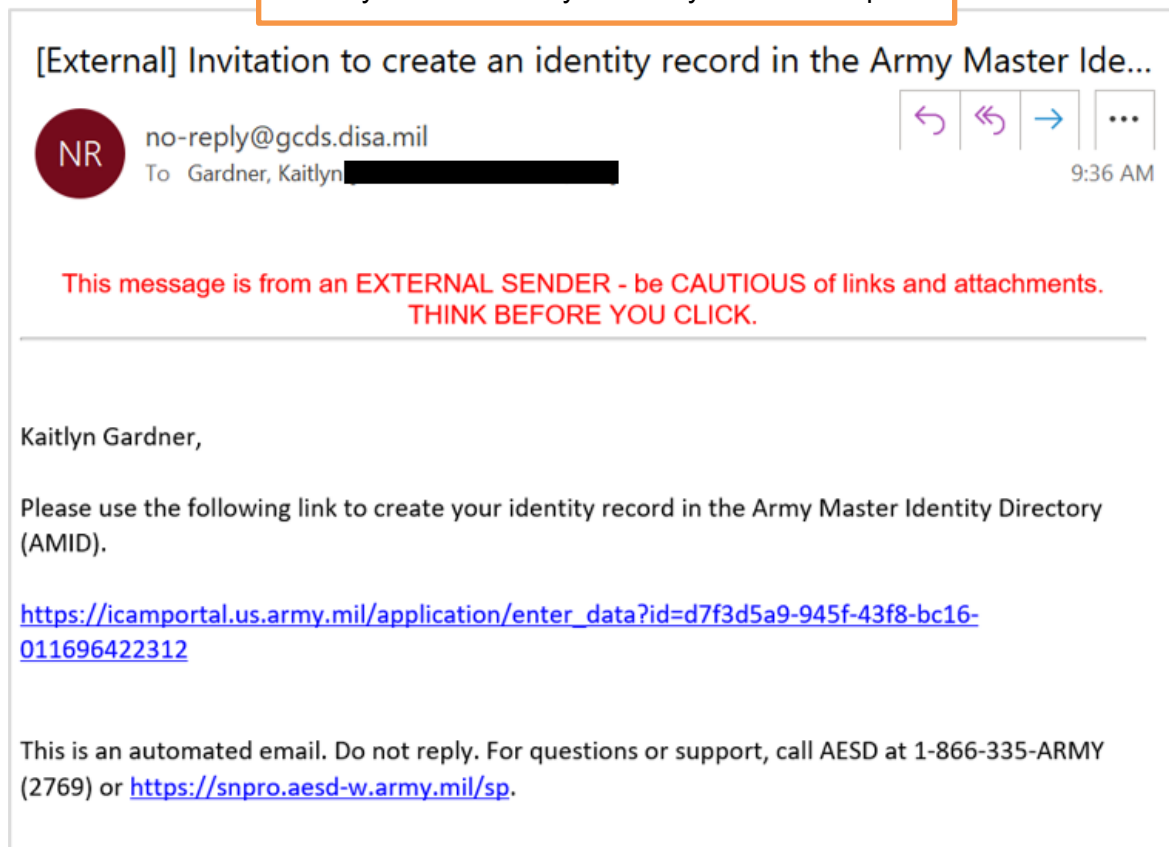

Once the Sponsor has successfully created your sponsored account, you will receive an e-mail to the e-mail address provided during account creation (personal or work e-mail). This will initiate the user's application to create their identity record in Army Master Identity Directory (AMID).

1. Open the email invitation, then copy and paste the link provided in the email into your browser.

NOTE: Launching the link directly from the email may not work depending on your browser, email and security settings therefore it is recommended you copy and paste the link into the browser manually. If you still get an error using the link, try launching in private or incognito browsing mode.

IMPORTANT: This link expires in 24 hours from the time it was generated; if this link expires, the Sponsor will need to resend it. Therefore, the sponsor shall immediately contact the Invited User by phone or other means to inform them to take immediate action to create an identity account.

3. In the "ID Fields" section, **select the checkbox** for *Check if you do not have a FASCN and do not plan to login with a CAC (Optional)*. This will populate additional ID fields. Complete the fields:

ID Fields
Enter one or more ID fields.

- If you are not a U.S. citizen then the FASCN is the preferred entry if available.
- FASCN is required for CAC login.

Check if you do not have a FASCN and do not plan to login with a CAC. (Optional)

☒ ←

SSN (Optional)
123-45-6789

FIN (Optional)
You must enter one or more ID field.

EDIPI (Optional)
EDIPI will be pulled from valid FASCN if entered
You must enter one or more ID field.

How to find FASCN

- Open IE (or other browser).
- Tools
- Internet Options
- Content
- Certificates
- Select your Authentication Cert.
- Select the "Details" tab.
- Click on the "Subject Alternative Name" field.
- You may have to scroll down the list of fields to find it.
- There will be an entry similar to the following:
Other Name:
Principal Name=1234567890123456@mail
The 16 digit number prior to the @mil is the FASCN.

NOTE: You must complete AT LEAST one of the ID fields to be able to submit the application.

Field	Entry	Additional Guidance
SSN (Optional)	Enter your social security number (###-##-####)	- This is the ONLY valid entry for non-CAC TAV-C end users - System will validate unique SSN entries and will not accept duplicates; must be in the correct format
FIN (Optional)	Enter a foreign identification number (must be 9 or 10 digits)	- DO NOT USE: not applicable to LMP TAV-C users - Duplicate entries are acceptable
EDIPI (Optional)	Blank	- DO NOT USE: for CAC users only - User should not have (or use) the EDIPI field

5. Click **SUBMIT APPLICATION**.

Thank You for Submitting Your Application

Your sponsor will review the data you entered and get back to you with next steps.

[External] Thank you for applying for an identity record in the Army M...

no-reply@gcds.disa.mil

To Gardner, Kaitlyn

9:50 AM

This message is from an **EXTERNAL SENDER** - be **CAUTIOUS** of links and attachments.
THINK BEFORE YOU CLICK.

Kaitlyn Gardner,

Thank you for completing the application for an identity record in the Army Master Identity Directory (AMID). Your sponsor will now review your application. You will receive further updates via email after the application has been processed.

Please contact **< sponsor's name >** if you have any questions or concerns.

This is an automated email. Do not reply. For questions or support, call AESD at 1-866-335-ARMY (2769) or <https://snpro.aesd-w.army.mil/sp>.

6. You will receive a Thank You confirmation system message and a confirmation email. Notify the Sponsor that the application is complete so they can complete the application approval.

LMP TAV-C Portal End User Access Procedures

Multi-Factor Authentication

The use of multi-factor authentication is a requirement to access the TAV-C Portal without a CAC. You will require a personal device with access to download apps from the Apple App Store or Google Play.

1. Go to the [Welcome // ICAM Portal \(army.mil\)](https://www.army.mil/Welcome/ICAMPortal) and click on **MobileConnect**.

2. Click **Register**.

3. On the *EAMS-A Login Single Sign-On* page, enter your account username and password and click **Login**.

LMP TAV-C Portal End User Access Procedures

4. The page will show My Status: Not Registered. Follow the instructions on this page:
 - a. Download the **MobileConnect** app on the Apple App Store or Google Play.
 - b. Launch the app and follow the app instructions to register.
 - c. Scan the unique QR code on this webpage to complete registration. If needed, you can Refresh code from this webpage to update the unique QR code.

5. That's it. Now just log in to EAMS-A with your username and password. Each time you log in, you will receive a notification on your device asking you to approve or deny the login attempt. Be sure to have your device with **MobileConnect** installed handy during login.
